SUMMARY

Versatile Full-Stack Web Developer | React | Node.js | MongoDB | Next.js | Angular | SvelteKit

A dynamic developer with 5+ years of hands-on expertise in building scalable, performance-optimized web applications across diverse stacks including MERN, MEAN.

Adept at transforming legacy codebases into modern architectures, I've led initiatives that resulted in a 30% boost in load speed and user satisfaction.

From migrating enterprise-grade apps from Angular to React, to spearheading full-stack solutions as a freelancer and delivering production-ready platforms using Next.js, TypeScript, and AWS — I thrive in fast-paced, agile ecosystems. I've also collaborated with AI startups to modernize UI from PHP/Laravel to Next.js 14 with SSR capabilities.

EDUCATION

VIT University, Vellore

B.TECH - Electrical & Electronics Engineering (6.74/10 CGPA)

Relevant Courses: Data Structures & Algorithms, Operating Systems, Object Oriented Programming

2012 — 2017

Goethe Institut Indien

German Language - Levels A1, A2

MAR 2025 - SEP 2025

12th grade	10th grade
High School Diploma (91.5%)	SSC (92.6%)
2010 — 2012	**2008 — 2010**

CERTIFICATIONS

1. AWS, JavaScript, React | Deploy Web Apps on the Cloud

2. AWS Beginner to Intermediate: EC2, IAM, S3 Route

3. Angular Certificate

4. React.js Certificate

WORK EXPERIENCE

Straive   **Senior Software Developer**   **NOV 2024 - Present**
I managed the migration of AI product UIs from PHP/Laravel to Next.js 14, harnessing SSR and app routing for enhanced scalability. I built intuitive interfaces for AI tools like Alt Text Writing, OCR, VisualAIze (graph rendering), document converters, and IRIS, a sophisticated asset/user management system.

Saaragh   **Frontend Developer**   **JUL 2023 - NOV 2024**
HReasily (Client company)   **React Developer**
I developed responsive, scalable UIs for AI platforms using React, Docusaurus, and CSS3, integrated components across landing pages, pricing sections. Beyond coding, I also delivered investor pitches and product demos, bridging the gap between tech and business.
I led the migration of legacy Angular 1/2 codebases to React 16, building modular components using Hooks, Props, and Context API. I contributed to key modules like Audit Logs and Reports, handled bug fixes.

Freelancer   **MEAN, MERN Stack Developer**   **DEC 2022 - JUN 2023**
I've built hands-on full-stack projects including a MERN eCommerce app with Redux, protected routes, advanced React patterns, and a Next.js CRUD app with API routes for seamless server/client-side rendering.

Photon   **Node.js Developer**   **SEP 2022 - NOV 2022**
I built and tested RESTful APIs using Node.js, Express.js, and Postman, used MongoDB for seamless data handling and integration, leveraging middleware like CORS, Mongoose, and Dotenv, while ensuring clean, modular server-side code and smooth frontend-backend data flow.

ISYS Technologies   **Software Consultant**   **SEP 2018 - JUL 2022**
Larsen & Toubro (Client company)   **Angular Developer**
I kickstarted my full-stack journey by building MEAN and MERN stack projects, mastering RESTful APIs and testing endpoints with Postman. Along the way, I developed apps using both Angular and React, while honing my skills in Git for version control and team collaboration.
I built components for asset dispatch, challan/receipt generation, Dispatch Advice and commissioning. I also developed a dynamic UI, optimizing the codebase for clarity and long-term maintainability.

SKILLS (YEARS OF EXPERIENCE)

Languages - Javascript (ES6+) **(6)**, Typescript **(6)**, Python **(3)**
Frameworks - React.js **(6)**, Next.js **(6)**, Angular **(6)**, SvelteKit **(6)**, Node.js **(6)**
Styling frameworks - CSS3 **(6)**, SASS **(6)**, Bootstrap5 **(6)**, Infima **(6)**, Tailwind **(6)**, Material UI **(6)**, Styled Components **(6)**, Shadcn/ui **(6)**, Ant Design **(6)**
Libraries - Redux **(6)**, Recoil **(6)**, Zustand **(6)**, Jotai **(6)**, ngRx **(6)**, RxJs **(6)**, Express.js **(6)**, Mongoose **(6)**
Databases - MongoDB **(6)**, Firebase **(6)**, Hygraph **(6)**, Supabase **(6)**, AWS **(3)**
Tools/ IDE - VS code **(6)**, PyCharm **(6)**, IntelliJ **(6)**, NPM **(6)**, Postman API **(6)**, Figma **(6)**
Architecture/ Patterns - Microservices **(6)**, RESTful APIs **(6)**, MVC **(6)**, OOP **(6)**, Multithreading **(6)**, System Design **(3)**, Agile Methodologies **(6)**
Devops - Git **(6)**, Github **(6)**, Gitlab **(6)**, Docker **(3)**, Jira **(6)**, Confluence **(6)**, Atlassian **(6)**, Bitbucket **(6)**, Vercel **(6)**, Netlify **(6)**
Hands-on - Django **(3)**, Fast API **(3)**, OAuth **(5)**, Strapi **(4)**, Three.js **(3)**, GSAP **(3)**
English (fluent)**, German** (conversational)

PROJECTS

https://saaragh.com/, https://navan.ai/, https://niia.ai/ Engineered sleek UIs for AI-driven platforms using React.js and Docusaurus. And for AI tools like Assist, OCR, Iris, VisualAIze by migrating from PHP/Laravel to Next.js 14 with SSR. Also developed SaaS tools: Nuvonote (note-taking) https://nuvonote.vercel.app/ and Talenzaic (AI job board) https://talenzaic.vercel.app/.
